

# National Pediatric Readiness Project

www.PediatricReadiness.org

## Purpose:

The Institute of Medicine (IOM) made a recommendation in 2006 for regionalized systems of care and further recommended that hospitals and EMS systems appoint qualified coordinators for pediatric emergency care. EDs that appoint these positions tend to be more prepared as measured by compliance with guidelines on the care of children in the ED published by the American College of Emergency Physicians and American Academy of Pediatrics and the Emergency Nurses Association.

## Qualifications:

The pediatric emergency care physician coordinator has the following qualifications:

- a. Meets the qualifications for credentialing by the hospital as a specialist in emergency medicine or pediatric emergency medicine. It is recognized that physicians in these specialties may not always be available in some communities; in these areas, the physician coordinator must meet the qualifications for credentialing by the hospital as a specialist in pediatrics or family medicine and demonstrate, through experience or continuing education, competence in the care of children in emergency settings, including resuscitation.
- b. Has special interest, knowledge, and skill in emergency medical care of children as demonstrated by training, clinical experience, or focused continuing medical education.
- c. Maintains competency in pediatric emergency care.
- d. May be a staff physician who is currently assigned other roles in the ED or may be shared through formal consultation agreements with professional resources from a hospital that is capable of providing definitive pediatric care.

## Responsibilities:

The physician coordinator is responsible for the following:

- a. Promoting and verifying adequate skill and knowledge of ED staff physicians and other ED health care providers (i.e., physician assistants and advanced practice nurses) in the emergency care and resuscitation of infants and children.
- b. Participating in ED pediatric QI, PI, patient safety, injury and illness prevention, and clinical care activities.
- c. Assisting with development and periodic review of ED policies and procedures and standards for medications, equipment, and supplies to ensure adequate resources for children of all ages.
- d. With the Nurse Coordinator, serving as liaison/coordinator to appropriate in-hospital and out-of-hospital pediatric care committees and other providers of pediatric inpatient or emergency care in the community, including EMS and definitive pediatric care hospitals.
- e. With the Nurse Coordinator, facilitating pediatric emergency education for ED health care providers and out-of-hospital providers affiliated with the ED.
- f. With the Nurse Coordinator, ensuring that competency evaluations completed by the staff are pertinent to children of all ages.
- g. With the Nurse Coordinator, ensuring that pediatric needs are addressed in hospital disaster/emergency preparedness plans.
- h. Collaborating with the nursing coordinator to ensure adequate staffing, medications, equipment, supplies, and other resources for children in the ED.
